Hey Phil—

Either day will work for me.

Dave

Subject: MPCA Wild Rice studies discussion

Colleagues,

Hi! As you may be aware, we have completed the studies designed to help better inform our (MCPA) efforts to revise the Minnesota sulfate WQS for protection of wild rice. Ed and I, along with our UMD colleagues (John Pastor, Nate Johnson and Brad Dewey) would like an opportunity to meet with you to discuss the study results and get some of your insight/guidance on the issue.

Right now either Tuesday February 4 or Thursday February 6 are the best days available. Plan for 2 -2 ½ h and I'm working on providing lunch so maybe a start time of 11 to noon or so. Let me know what might work for you.

We will provide a presentation about the final study outputs as part of our discussion.

Below is the link to all the WR study report files. I've attached a summary that reflects our current thinking and probably administrative intentions for the WQS work, etc.

<ftp://files.pca.state.mn.us/pub/tmp/wildRice/>

I realize that this is a tight time schedule and we all appreciate whatever support you can provide.

Thanks. Oh, and Happy New Year.

Phil
